

Supplementary Table 1. List of key clinical questions

Disease	Category	Clinical question
Atrophic gastritis/ Intestinal metaplasia	Diagnosis	#1. Is image-enhanced endoscopy helpful in the diagnosis of atrophic gastritis and intestinal metaplasia?
		#2. If atrophic gastritis or intestinal metaplasia is suspected on white-light endoscopy, should a biopsy be performed to confirm the diagnosis?
		#3. Do patients with a high-risk stage of atrophic gastritis/intestinal epithelial metaplasia have an increased risk of gastric cancer compared to patients with a low-risk stage?
	Treatment	#4. Can eradication therapy of <i>H. pylori</i> reduce the incidence of gastric cancer in <i>H. pylori</i> gastritis patients?
		#5. In <i>H. pylori</i> -positive atrophic gastritis/intestinal metaplasia, does eradication therapy improve atrophic gastritis/intestinal metaplasia?
	Surveillance	#6. In patients diagnosed with intestinal metaplasia during endoscopy, does endoscopy at intervals of less than 2 years help reduce gastric cancer mortality compared to endoscopy at intervals of 2 years?
Erosive gastritis	Treatment	#7. Does proton pump inhibitors improve erosive gastritis?
		#8. Does mucosal protective agent improve erosive gastritis?
